

THE GRINDABLE JOINT PROFILE FOR INDUSTRIAL FLOORS

- ✓ **Low-impact driving**
vibration-free rolling protects vehicles, cargo and the health of your staff.
- ✓ **Long-term solution**
Differences in floor levels can be reliably eliminated by simply re-sanding – without the need for costly renovation work.
- ✓ **Cost-effective in the long term**
Avoids costly follow-up expenses for joint repairs and protects against costly business interruptions.
- ✓ **Easy to install**
Sturdy, stable design for quick and precise installation.
- ✓ **Future-proof**
The ideal solution for highly automated logistics centres and production halls.

Complies with EU
Vibration Directive
No. 2002/44/EC

INNOVATION MEETS EXPERIENCE

WELL THOUGHT OUT FROM THE VERY START

The critical point of any surface: the joint.

An industrial floor is only as good as its joints. But concrete moves: it shrinks and bulges at the edges of the joints – a natural process that can quickly lead to dangerous level differences. Even a few millimetres are enough to slow down forklifts, disrupt automated guided vehicles (AGVs), cause costly repairs and pose a health risk to your staff.

FUjoint, the smart joint solution that thinks for itself.

The grindable hybrid joint profile creates a permanently level, vibration-free joint transition – with no noticeable edge.

FUjoint doesn't just bridge the gap; it paves the way.

STABLE. DURABLE. SUSTAINABLE.
